This is going to be the QLCA new spare lure machine, over the next months it will be rebuilt into the machine to drive the lure.

The GPZ400 which is presently the clubs spare bike will be consigned to the history books. The GPZ400 has been used from 2005 till 2017 as the main bike then became the spare bike to drive the lure when the Kawasaki Ninja 650 was put into service with reverse.

The development of the gear for lure coursing is never ending.

This is the GPZ400 the Ninja 650 will be replacing.

The first and present machines

In the top picture we have the very first machine used for lure coursing way back in 1984. It is a 12v drag out lure by hand.

Compare that to the latest machine been used today, 6 speed gearbox, reverse, precise control of the lure and you get to sit down all day.

Yes we have come a very long way since 1984
